OASlcs – OpenAccess Series in Informatics

OASlcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASlcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

■ Contents

Preface	
<i>Andrew V. Jones and Nicholas Ng</i>	i

Keynotes

Laws of programming with concurrency	
<i>Tony Hoare</i>	1
Building Better Online Courses	
<i>Peter Norvig</i>	2

Regular Papers

A swarm based heuristic for sparse image recovery	
<i>Theofanis Apostolopoulos</i>	3
Scalable and Fault-tolerant Stateful Stream Processing	
<i>Raul Castro Fernandez, Matteo Migliavacca, Evangelia Kalyvianaki,</i> <i>and Peter Pietzuch</i>	11
Generalizing Multi-Context Systems for Reactive Stream Reasoning Applications	
<i>Stefan Ellmauthaler</i>	19
Conformal Prediction under Hypergraphical Models	
<i>Valentina Fedorova, Alex Gammerman, Ilia Nouretdinov, and Vladimir Vovk</i>	27
Relational Knowledge Extraction from Attribute-Value Learners	
<i>Manoel V. M. França, Artur S. D. Garcez, and Gerson Zaverucha</i>	35
Tools for the implementation of argumentation models	
<i>Bas van Gijzel</i>	43
Towards the Development of a Hybrid Parser for Natural Languages	
<i>Sardar F. Jaf and Allan Ramsay</i>	49
Improving the quality of APIs through the analysis of software crash reports	
<i>Maria Kechagia, Dimitris Mitropoulos, and Diomidis Spinellis</i>	57
Fast Implementation of the Scalable Video Coding Extension of the H.264/AVC Standard	
<i>Xin Lu and Graham R. Martin</i>	65
Improved Rate Control Algorithm for Scalable Video Coding	
<i>Xin Lu and Graham R. Martin</i>	73
An Optimal Real-time Pricing Algorithm for the Smart Grid: A Bi-level Programming Approach	
<i>Fan-Lin Meng and Xiao-Jun Zeng</i>	81

Dreaming Machines: On multimodal fusion and information retrieval using neural-symbolic cognitive agents <i>Leo de Penning, Artur d'Avila Garcez, and John-Jules C. Meyer</i>	89
Self-composition by Symbolic Execution <i>Quoc-Sang Phan</i>	95
Evaluation of Social Personalized Adaptive E-Learning Environments: End-User Point of View <i>Lei Shi, Malik Shahzad Awan, and Alexandra I. Cristea</i>	103
Logical Foundations of Services <i>Ionuț Țuțu</i>	111
Refactoring Boundary <i>Tim Wood and Sophia Drossopoulou</i>	119
Using Self-learning and Automatic Tuning to Improve the Performance of Sexual Genetic Algorithms for Constraint Satisfaction Problems <i>Hu Xu, Karen Petrie, and Iain Murray</i>	128
Achieving Superscalar Performance without Superscalar Overheads – A Dataflow Compiler IR for Custom Computing <i>Ali Mustafa Zaidi and David J. Greaves</i>	136
A Graph based approach for Co-scheduling jobs on Multi-core computers <i>Huanzhou Zhu and Ligang He</i>	144

■ Preface

We are pleased to present the proceedings of the third Imperial College Computing Student Workshop (ICCSW'13), which took place on 26th–27th September 2013 in London, and was hosted by Imperial College London.

ICCSW is an event organised with the “by students, for students” ethos in mind. The organisation work of the workshop was done by a committee formed of Ph.D. students in the Department of Computing, Imperial College London.

The vision for ICCSW is to provide a venue for doctoral students to experience running and participating in an academic workshop, as well as providing a networking opportunity for researchers in similar stages of their career. All of the papers and reviews for ICCSW were written by students; we adopted a unique peer review system in which all authors are also programme committee members for the workshop.

For the workshop's second year, we introduced a highly successful ambassador programme for students in different institutions to promote ICCSW. This invaluable programme helps to increase the scope and prominence of the event both nationally and internationally.

These proceedings contain 19 contributions in various fields from across computer science. This year the workshop received 27 submissions over two tracks: technical papers track, and tools and demonstrations track.

After a rigorous review and selection process, 19 papers were accepted to be presented at ICCSW'13, representing a 70% acceptance rate.

Both days of the workshop featured a keynote from a prominent researcher in computer science; we were truly grateful to have Turing Award winner, Sir Tony Hoare and Google's Director of Research, Peter Norvig, as our keynote speakers.

The talks were entitled:

- Laws of Programming with Concurrency, by Tony Hoare (Microsoft Research); and
- Building Better Online Courses, by Peter Norvig (Google Inc.)

On behalf of the organising committee, we wish to thank all authors, accepted or not, and our ambassadors, who acted as reviewers in our unique peer review process. Furthermore, we also wish to thank our sponsors: Imperial College London, who provided us with more than just financial support; Google, our platinum-level sponsor, who have supported ICCSW since its inception in 2011; Facebook for their gold-level sponsorship; and ARM and HP for their bronze-level sponsorship. Without the support of our sponsors, ICCSW'13 would not have been possible.

Andrew V. Jones and Nicholas Ng
ICCSW'13 Editors
