Contents

Preface <i>Mark A. Finlayson</i>	vii
---	-----

Invited Contributions

Toward Neurally-Inspired Computational Models of Narrative <i>Jeffrey M. Zacks</i>	1
Narrative in the Operations Process <i>Sohail A. Shaikh and Robert D. Payne III</i>	2
What Makes Stories Similar? Report on a Research Project, 2011–2014 <i>Bernhard Fisseni and Benedikt Löwe</i>	9

Regular Papers

A Task Based model for Récit Generation from Sensor Data: An Early Experiment <i>Belén A. Baez Miranda, Sybille Caffiau, Catherine Garbay, and François Portet</i> ..	13
A Character Model with Moral Emotions: Preliminary Evaluation <i>Cristina Battaglino and Rossana Damiano</i>	24
Towards Empathic Neurofeedback for Interactive Storytelling <i>Marc Cavazza, Gabor Aranyi, Fred Charles, Julie Porteous, Stephen Gilroy, Ilana Klovatch, Gilan Jackont, Eyal Soreq, Nimrod Jakob Keynan, Avihay Cohen, Gal Raz, and Talma Hendler</i>	42
The Need for Multi-Aspectual Representation of Narratives in Modelling their Creative Process <i>Pablo Gervás and Carlos León</i>	61
Model of Narrative Nowness for Neurocinematic Experiments <i>Janne Kauttonen, Mauri Kaipainen, and Pia Tikka</i>	77
Mindreading, Privileged Access and Understanding Narratives <i>Szabolcs Kiss and Zoltán Jakab</i>	88
A Hybrid Representational Proposal for Narrative Concepts: A Case Study on Character Roles <i>Antonio Lieto and Rossana Damiano</i>	106
Modeling the Function of Narrative in Expertise <i>W. Korey MacDougall, Robert L. West, and Christopher Genovesi</i>	116
Plot Analysis for Describing Punch Line Functions in Shinichi Hoshi's Microfiction <i>Hajime Murai</i>	121
A Flexible Framework for the Creation of Narrative-Centered Tools <i>James Niehaus, Victoria Romero, David Koelle, Noa Palmon, Bethany Bracken, Jonathan Pfautz, Scott Neal Reilly, and Peter Weyhrauch</i>	130

Applying Qualitative Research Methods to Narrative Knowledge Engineering <i>Brian O'Neill and Mark Riedl</i>	139
Gathering Background Knowledge for Story Understanding through Crowdsourcing <i>Christos T. Rodosthenous and Loizos Michael</i>	154
Where Story and Media Meet: Computer Generation of Narrative Discourse <i>Remi Ronfard and Nicolas Szilas</i>	164
A Cognitive Approach to Narrative Planning with Believable Characters <i>Antoine Saillenfest and Jean-Louis Désalles</i>	177
Legal Knowledge Conveyed by Narratives: Towards a Representational Model <i>Giovanni Sileno, Alexander Boer, and Tom van Engers</i>	182
Multilevel Accentuation and its Role in the Memorization of Narrative <i>Oleg Sobchuk</i>	192
Modifying Entity Relationship Models for Collaborative Fiction Planning and its Impact on Potential Authors <i>Alan Tapscott, Joaquim Colàs, Ayman Moghnieh, and Josep Blat</i>	209
A Cognitive Framework for Understanding Counterintuitive Stories <i>M. Afzal Upal</i>	222
Finding Stories in 1,784,532 Events: Scaling Up Computational Models of Narrative <i>Marieke van Erp, Antske Fokkens, and Piek Vossen</i>	241
Narratives as a Fundamental Component of Consciousness <i>Sandra L. Vaughan, Robert F. Mills, Michael R. Grimalia, Gilbert L. Peterson, and Steven K. Rogers</i>	246
A Computational Narrative Analysis of Children-Parent Attachment Relationships <i>Iraide Zipitria and Nerea Portu-Zapirain</i>	251

Preface

Welcome to the Fifth Workshop on Computational Models of Narrative. This year finds us once again co-located with the Annual Meeting of the Cognitive Science Society (CogSci 2014), and again associated with AAAI, in the form of co-location with AAAI-14 and IAAI-14. We are also co-located with the Annual Computational Neuroscience Meeting (CNS 2014). This latter association, along with the end of DARPA’s Narrative Networks program, made it convenient to have a special focus on the intersection of neuroscience and narrative. Although this intersection is currently small, I believe we will see much more activity in this areas in coming years, as neuroscience, cognitive science, and cognitive modeling become ever more integrated.

Interest in and submissions to the CMN workshop remain robust. This year we received 27 submissions; of these 7 were accepted outright and 5 were declined. In keeping with our goal of inclusiveness, 14 papers that the reviewers thought contained worthwhile contributions but had (fixable) flaws were accepted on condition of revision. None of these revised papers were declined after revision, although one paper was withdrawn. Including an additional 2 invited works and 1 keynote abstract brings the total number of published works in this proceedings to 24. These numbers have allowed us to reach an important milestone: the CMN workshop series has published exactly *101 works* across its six years, five meetings, and four proceedings volumes! This sustained pace bodes well for the future of the workshop series and the field.

This year we are proud to give the *Award for Best Student Paper on a Cognitive Science Topic* to Oleg Sobchuk of the University of Tartu for his paper “Multilevel Accentuation and its Role in the Memorization of Narrative.” Oleg will receive a \$250 award, as well as a year’s membership in the Cognitive Science Society.

In an effort to ensure the longevity and continued vitality of the workshop series, we will begin a transition period over the next few years from my stewardship to a more formal organizational structure. We will establish a steering committee, comprised of former organizers and co-organizers of the workshop. We will also move to a “staged” organization arrangement, where those who volunteer to be lead organizer of the workshop in year X will help co-organize the workshop in year X-1. This arrangement will not only help new organizers learn the ropes, but help lend continuity to the series.

Many thanks to our generous sponsors without whom this year’s workshop would not have been possible: The United States Office of Naval Research Global (ONR-G) again provided funds for the venue and travel grant money; and the Cognitive Science Society funded our best paper award.

Mark A. Finlayson
