OASlcs – OpenAccess Series in Informatics

OASlcs aims at a suitable publication venue to publish peer-reviewed collections of papers emerging from a scientific event. OASlcs volumes are published according to the principle of Open Access, i.e., they are available online and free of charge.

Editorial Board

■ Contents

Preface	
<i>Ralf Borndörfer and Sabine Storandt</i>	0:vii

ATMOS'18 Best VGI Paper Award

Reformulations for Integrated Planning of Railway Traffic and Network Maintenance	
<i>Tomas Lidén</i>	1:1–1:10

Railway Optimization

Large Scale Railway Renewal Planning with a Multiobjective Modeling Approach	
<i>Nuno Sousa, Luís Alçada-Almeida, and João Coutinho-Rodrigues</i>	2:1–2:9

Robust Optimization

How to Measure the Robustness of Shunting Plans	
<i>Roel van den Broek, Han Hoogeveen, and Marjan van den Akker</i>	3:1–3:13
Robustness as a Third Dimension for Evaluating Public Transport Plans	
<i>Markus Friedrich, Matthias Müller-Hannemann, Ralf Rückert, Alexander Schiewe, and Anita Schöbel</i>	4:1–4:17
Fast Robust Shortest Path Computations	
<i>Christoph Hansknecht, Alexander Richter, and Sebastian Stiller</i>	5:1–5:21

Timetabling & Line Planning

Tree Decomposition Methods for the Periodic Event Scheduling Problem	
<i>Irving van Heuven van Staereeling</i>	6:1–6:13
A Bilevel Approach to Frequency Optimization in Public Transportation Systems	
<i>Agustín Arizti, Antonio Mauttone, and María E. Urquhart</i>	7:1–7:13
Cost-Minimal Public Transport Planning	
<i>Julius Pätzold, Alexander Schiewe, and Anita Schöbel</i>	8:1–8:22

Individual Traffic

Changing Lanes on a Highway	
<i>Thomas Petig, Elad M. Schiller, and Jukka Suomela</i>	9:1–9:15
Parameterized Algorithms and Data Reduction for Safe Convoy Routing	
<i>René van Bevern, Till Fluschnik, and Oxana Yu. Tsidulko</i>	10:1–10:19

18th Workshop on Algorithmic Approaches for Transportation Modelling, Optimization, and Systems (ATMOS 2018).

Editors: Ralf Borndörfer and Sabine Storandt

Open Access Series in Informatics

Schloss Dagstuhl – Leibniz-Zentrum für Informatik, Dagstuhl Publishing, Germany

A Neighborhood Search and Set Cover Hybrid Heuristic for the Two-Echelon Vehicle Routing Problem
Youcef Amarouche, Rym N. Guïbadj, and Aziz Moukrim 11:1–11:15

Game Theory

Multi-Source Multi-Sink Nash Flows over Time
Leon Sering and Martin Skutella 12:1–12:20

Oligopolistic Competitive Packet Routing
Britta Peis, Bjoern Tauer, Veerle Timmermans, and Laura Vargas Koch 13:1–13:22

Vehicle Scheduling

The Path&Cycle Formulation for the Hotspot Problem in Air Traffic Management
Carlo Mannino and Giorgio Sartor 14:1–14:11

Vehicle Scheduling Based on a Line Plan
Rolf N. van Lieshout and Paul C. Bouman 15:1–15:14

ATMOS'18 Best Paper Award

A Simple Way to Compute the Number of Vehicles That Are Required to Operate a Periodic Timetable
Ralf Borndörfer, Marika Karbstein, Christian Liebchen, and Niels Lindner 16:1–16:15

■ Preface

Running and optimizing transportation systems give rise to very complex and large-scale optimization problems requiring innovative solution techniques and ideas from mathematical optimization, theoretical computer science, and operations research. Since 2000, the series of Algorithmic Approaches for Transportation Modelling, Optimization, and Systems (ATMOS) workshops brings together researchers and practitioners who are interested in all aspects of algorithmic methods and models for transportation optimization and provides a forum for the exchange and dissemination of new ideas and techniques. The scope of ATMOS comprises all modes of transportation.

The 18th ATMOS workshop (ATMOS'18) was held in connection with ALGO'18 and hosted by Aalto University in Helsinki, Finland, on August 23–24, 2018. Topics of interest were all optimization problems for passenger and freight transport, including, but not limited to, demand forecasting, models for user behavior, design of pricing systems, infrastructure planning, multi-modal transport optimization, mobile applications for transport, congestion modelling and reduction, line planning, timetable generation, routing and platform assignment, vehicle scheduling, route planning, crew and duty scheduling, rostering, delay management, routing in road networks, traffic guidance, and electro mobility. Of particular interest were papers applying and advancing techniques like graph and network algorithms, combinatorial optimization, mathematical programming, approximation algorithms, methods for the integration of planning stages, stochastic and robust optimization, online and real-time algorithms, algorithmic game theory, heuristics for real-world instances, and simulation tools.

There were twenty-nine submissions from eighteen countries. All of them were reviewed by at least three referees in ninety-one reviews, among them five external ones, and judged on their originality, technical quality, and relevance to the topics of the workshop. Based on the reviews, the program committee selected sixteen submissions to be presented at the workshop (acceptance rate: 55%), which are collected in this volume in the order in which they were presented. Together, they quite impressively demonstrate the range of applicability of algorithmic optimization to transportation problems in a wide sense. In addition, Dennis Huisman kindly agreed to complement the program with an invited talk on *Railway Disruption Management: State-of-the-Art in Practice and New Research Directions*.

Based on the reviews, Ralf Borndörfer, Marika Karbstein, Christian Liebchen, and Niels Lindner won the Best Paper Award of ATMOS'18 with their paper *A Simple Way to Compute the Number of Vehicles That Are Required to Operate a Periodic Timetable*. In addition, we awarded Tomas Lidén the Best VGI Paper Award of ATMOS'18 for his paper *Reformulations for Integrated Planning of Railway Traffic and Network Maintenance*.

We would like to thank the members of the Steering Committee of ATMOS for giving us the opportunity to serve as Program Chairs of ATMOS'18, all the authors who submitted papers, Dennis Huisman for accepting our invitation to present an invited talk, the members of the Program Committee and the additional reviewers for their valuable work in selecting the papers appearing in this volume, our sponsors MODAL, TomTom, and VGIsience for their support of the prizes, and the local organizers for hosting the workshop as part of ALGO'18. We acknowledge the use of the EasyChair system for the great help in managing the submission and review processes, and Schloss Dagstuhl for publishing the proceedings of ATMOS'18 in its OASICs series.

■ Organization

Program Committee

Markus Bohlin	RISE SICS, Sweden
Ralf Borndörfer (co-chair)	Zuse Institute Berlin/Freie Universität Berlin, Germany
Stefan Funke	Universität Stuttgart, Germany
Natalia Kliewer	Freie Universität Berlin, Germany
Spyros Kontogiannis	University of Ioannina, Greece
Alexander Kröller	TomTom, Germany
Jesper Larsen	Technical University of Denmark, Denmark
Carlo Mannino	SINTEF, Norway
Matthias Müller-Hannemann	Martin-Luther-Universität Halle-Wittenberg, Germany
Güvenç Şahin	Sabancı Üniversitesi, Turkey
Peter Sanders	Karlsruhe Institute of Technology, Germany
Marie Schmidt	Erasmus University Rotterdam, Netherlands
Sabine Storandt (co-chair)	University of Würzburg, Germany
Pieter Vansteenwegen	Katholieke Universiteit Leuven, Belgium
Renato Werneck	Amazon, USA

Steering Committee

Alberto Marchetti-Spaccamela	Universita di Roma “La Sapienza”, Italy
Anita Schöbel	Georg-August-Universität Göttingen, Germany
Dorothea Wagner	Karlsruhe Institute of Technology (KIT), Germany
Christos Zaroliagis (chair)	University of Patras, Greece

List of Subreviewers

Lukas Bach	SINTEF, Norway
Valentin Buchhold	Karlsruhe Institute of Technology, Germany
Stefan Funke	Universität Stuttgart, Germany
Sascha Witt	Karlsruhe Institute of Technology, Germany
Andreas Linscheid	TomTom, Germany
Dario Pacciarelli	Universita di Roma “La Sapienza”, Italy

Local Organizing Committee

Parinya Chalermsook	Aalto University, Finland
Petteri Kaski	Aalto University, Finland
Jukka Suomela	Aalto University, Finland
