Preface

The papers in this volume were presented at the 11th Innovations in Theoretical Computer Science (ITCS 2020) conference. The conference was held at the University of Washington in Seattle, WA, USA, January 12-14, 2020. ITCS seeks to promote research that carries a strong conceptual message, for instance, introducing a new concept or model, opening a new line of inquiry within traditional or cross-interdisciplinary areas,introducing new techniques, or making novel connections between existing areas and ideas. The conference format is single-session and aims to promote the exchange of ideas between different areas of theoretical computer science and with other disciplines. The call for papers welcomed all submissions, whether aligned with current theory of computation research directions or deviating from them. A record 204 submissions were received. Of these, the program committee selected 86 papers. I would like to thank the authors of all submissions, whether accepted or not, for their interest in ITCS.

The program committee consisted of 32 members (plus the chair): Nikhil Bansal, CWI + TU Eindhoven; Nir Bitansky, Tel-Aviv University; Clement Canonne, Stanford; Timothy Chan, University of Illinois at Urbana-Champaign; Edith Cohen, Google and Tel-Aviv University; Shaddin Dughmi, University of Southern California; Sumegha Garg, Princeton; Ankit Garg, Microsoft research; Ran Gelles, Bar-Ilan University; Elena Grigorescu, Purdue; Tom Gur, University of Warwick; Sandy Irani, UC Irvine; Dakshita Khurana, University of Illinois at Urbana-Champaign; Antonina Kolokolova, Memorial University of Newfoundland.; Pravesh Kothari, Carnegie Mellon University; Rasmus Kyng, Harvard; Katrina Ligett, Hebrew University; Nutan Limaye, IIT Bombay; Pasin Manurangsi, UC Berkeley; Tamara Mchedlidze, Karlsruhe Institute of Technology; Dana Moshkovitz, UT Austin; Jelani Nelson, UC Berkeley; Merav Parter, Weizmann Institute; Krzysztof Pietrzak, IST Austria; Elaine Shi, Cornell; Piyush Srivastava, Tata Institute of Fundamental Research, Mumbai; Li-Yang Tan, Stanford; Madhur Tulsiani, TTIC; Gregory Valiant, Stanford; Virginia Vassilevska Williams, MIT; Ronald de Wolf, CWI and University of Amsterdam; David Woodruff, Carnegie Mellon University.

I wish to express my heartfelt thanks to them for agreeing to join the committee as well as for investing a great deal of time and effort to evaluate the submissions. I am also grateful to the many subreviewers who assisted with the reviewing process. The local organizer was Shayan Oveis Gharan from University of Washington. I would like to thank him very much for his service. I'm also grateful to Umesh Vazirani, chair of the ITCS Steering Committee, and the entire Steering Committee for their help and guidance in shaping the format of the conference. Finally, I would like to thank all the presenters and the audience at ITCS for making ITCS a wonderful experience.
