■ Preface

The 3rd International Workshop on Formal Methods for Blockchains (FMBC) took place virtually on July 18/19 2021 as part of CAV 2021, the 33rd International Conference on Computer-Aided Verification. FMBC's purpose is to be a forum to identify theoretical and practical approaches applying formal methods to blockchain technology.

This third edition of FMBC attracted 15 submissions on topics such as verification of smart contracts or analysis of consensus protocols. Each paper was reviewed by at least three program committee members or appointed external reviewers. This led to a selection of 5 papers (2 long and 3 short) that were presented at the workshop as regular talks, as well as 3 extended abstracts that were presented as lightning talks. Additionally, we were very pleased to have an invited keynote by David L. Dill (Novi/Facebook, USA).

This volume contains the papers selected for regular talks as well as the abstract of the invited talk.

We thank all the authors that submitted a paper, as well as the program committee members and external reviewers for their immense work. We are grateful to Arie Gurfinkel, Workshop Chair of CAV 2021, for his guidance. Finally, we would like to express our gratitude to our sponsor Nomadic Labs for its generous support.
